PRESS RELEASE

Educational program “Our children show the way forward” for elementary school students

In the context of its Corporate Social Responsibility Policy, Vassiliko Cement Works organized, in cooperation with Larnaca Traffic Police, an educational program for children on traffic education, in order to prevent car accidents and to offer knowledge on road safety behavior.

In total, 280 students from neighboring communities attended the program ‘Our children show the way forward’, from 9-11 April 2019, at the premises of elementary schools.

The program consisted of two phases, theoretical and practical. The theoretical part included general information by the Larnaca District Police Officer in charge and regarded the correct use of the car safety belt and how co-drivers could protect their life from accidents. The practical part was completed with the use of educational material, such as traffic signs and a zebra cross street simulation.

Road safety is of vital importance for children and young people and it is never too early to effect relevant training. Vassiliko Cement Works regularly organizes such training programs for students, aiming at teaching proper traffic behavior and road safety rules to be considered.
