## Vassiliko Cement Works established the “Career Guidance Conferences” as an Institution

### PRESS RELEASE

In 2018, Vassiliko Cement Works established the “Conferences on Engineering” addressed to students of B’ and C’ grade of Upper Secondary School and Technical Schools, in cooperation with the Technical Chamber of Cyprus (ETEK) and the Career Counseling and Educational Services (CCES) of the Ministry of Education, Culture, Sports & Youth.

The conferences are held at the Company's facilities; the speakers are engineers of different specializations (Mechanical Engineers, Chemical Engineers, Electrical Engineers, etc.) from Vassiliko Cement Works and representatives from the Technical Chamber of Cyprus (ETEK), who aim at informing students on the Engineering-related professions. Ten conferences have taken place so far with the participation of 255 students in total. For the school year 2019-2020, the conferences have been completed and a new round will begin in the next school year.

During the conference, students are presented with various engineering-related professions by the Company’s representatives, placing emphasis on the particularities of professions and how such features are utilized in a heavy industry. Then, students are guided at the cement industry’s facilities, observing the way of working in every profession and at the same time the Company’s representatives answer to any questions they may have.

The conferences were held and became established in the context of the Company’s regular activities for the academic community's briefing on Mechanical Engineering developments. Vassiliko Cement Works, as a socially responsible industry, acknowledges the needs of young people and supports local communities, taking innovative initiatives.

THE END

Vassiliko Cement Works, March 20, 2020
