

ENERGY MANAGEMENT POLICY

Vassiliko Cement Works undertakes the commitment to make efficient use of energy in its facilities and during its activities, to protect natural resources, reduce gas emissions and mitigate the impact on climate change. Vassiliko Cement Works applies an Energy Management System, in accordance with the requirements of ISO 50001:2018.

The Company's Management will effectively guide and promote relevant energy saving programs, ensuring that the organization operates in accordance with the principles established in this policy.

Vassiliko Cement Works sets objectives and targets that will continuously improve energy performance and reduce greenhouse gas emissions. To this end, management will ensure the availability of the necessary information and resources.

The Company is also committed to constantly improve the use of energy resources in its facilities and during its activities throughout its life cycle, taking into consideration new technological innovations, maximizing the design of production process and facilities, and supporting the purchase of energy efficient products and services.

Vassiliko Cement Works shall ensure compliance with all requirements of the relevant legislation and any other energy performance requirements, including efficiency in use and consumption. The Company will also encourage adjusting the functional use of its operations and facilities to ensure compliance with any changes in the applicable legislative framework and shall establish standards for energy efficiency management.

The Company understands the external and internal issues that may affect the performance of the company either negatively or positively and understands the needs and expectations of stakeholders. It also understands, evaluates and addresses threats and exploits the opportunities that affect the company's performance and strengthens leadership and commitment to integrated system management.

To promote a better understanding amongst stakeholders, Vassiliko Cement Works will provide reliable and transparent information related to energy consumption, the respective greenhouse gas emissions and the improving actions that have taken place.

The Company considers that ensuring compliance with this policy is the responsibility of all stakeholders without exception.

This policy will be announced and fully explained to personnel, with management confirming that it has been adequately understood.

The Energy Policy of Vassiliko Cement shall be periodically reviewed and revised and will be subjected to internal audits to reflect accurately that the procedures are consistent with this policy.
